

The Stratasys F123 Series

The Stratasys <u>F170[™] and F370[™] 3D printers</u> combine dependable <u>FDM[®] technology</u> with design-to-print <u>GrabCAD Print[™] software</u> for accurate, professional 3D printing results.

F123 Series printers are designed for ease of use, so you don't need special 3D printing expertise. True plug-and-play capability, autocalibration and fast, easy material swaps mean more time printing, maximizing your productivity. Super-quiet, clean operation makes any of these printers right at home in an office or classroom environment.

Fast-draft mode prints initial design concepts quickly and economically, while consuming half the material on average. Hands-free soluble support removal enables the creation of complex parts without compromising accuracy or detail. Remote monitoring lets you easily manage your print jobs from outside the office.
